TechXio

AI PRODUCTS AND CONSULTANCY

Value owned. Process engineered.

We agree the business outcome first, deliver it with AI-enabled teams, and answer for the result.

THE PROBLEM

Most technology is bought by the hour, and nobody owns the result.

Rate cards reward time spent. Quality is checked late. AI gets adopted for its own sake.

“How fast can we add meaningful value to the customer's business and their users' lives?”

- We don't sell resources by the seat.
- We don't compete on hourly rate.
- We don't hand over unowned work.
- We don't do staff augmentation.
- We don't apply AI for its own sake.

THE TECHXIO VALUE METHOD

Seven stages. Seven quality gates.

01	Business Problem Discovery
02	Value Mapping
03	Intelligent Solution Design
04	AI-Assisted Engineering
05	Automated Quality Assurance
06	Smart Deployment
07	Continuous Optimisation

Quality is managed, not inspected: every gate has an owner and evidence.

SERVICES AND PACKAGES

Seven services. Five ways to start.

- IT Consultancy & Value Addition
- Digital Transformation Consulting
- AI Strategy & Transformation
- AI Agentic Workflows
- Custom Software & AI-Enabled Delivery
