ABOUT TECHXIO

We are engaged for the value we add, not the hours we bill.

TechXio is a UK-headquartered global IT consultancy, digital transformation partner and AI-driven product company. Established in 2012 and in IT and software services since 2016, it relaunched as TechXio in 2026 and operates from the UK, the UAE, India and Bangladesh.

Every engagement starts with an outcome agreed in writing and runs through the TechXio Value Method: seven AI-enabled delivery stages, each with a quality gate and evidence. TechXio also builds and runs its own AI products, including EdXsim, PeopleSmartAI and AxenticOne, on the same method.

2012	4	5	7
Established	Locations	AI products of our own	Quality gates per engagement

WHAT WE BELIEVE

“How fast can we add meaningful value to the customer's business and their users' lives?”

The question every TechXio engagement starts with.

OUR PROMISE

We agree the outcome first, deliver it with AI-enabled teams, and answer for the result.

Value first
Every engagement starts with an outcome agreed in writing.

AI throughout
AI-enabled teams at every stage, where it changes the economics.

Quality managed, not inspected
A quality gate with evidence at every stage.

Proven in our own products
We build and run our own AI products on the same method.

WHAT WE DO

We advise, enable and build.

Most firms start with build. We start with the business case, and we make your own teams better rather than replacing them.

01

Advise

Consultancy and value addition first: we find where technology spend is not paying back, and agree what better looks like before anything is built.

02

Enable

We install the TechXio Value Method in your own teams: AI-enabled delivery with quality gates, coached until you run it without us.

03

Build

Senior teams build software, AI agent workflows and products, with a named owner accountable for the result.

Seven services, one standard.

IT Consultancy & Value Addition

Find where technology spend is not paying back, and fix it first.

Digital Transformation Consulting

Move processes and systems to a measurable new way of working.

AI Strategy & Transformation

Decide where AI changes the economics of the work, and where it does not.

AI Agentic Workflows

AI agents that take manual effort out of operations, with people approving.

Custom Software & AI-Enabled Delivery

Software built by senior teams using the AI-enabled delivery method.

Product Engineering

From idea to MVP to scale, with one accountable team.

Cloud & DevOps

Platforms that ship safely, scale and cost what they should.

All under the Value Method

Same gates, same evidence, whichever service you buy.

Start small. Prove the value.

Five fixed-scope packages make it easy to begin. Most clients start with a Value Discovery Sprint.

01

Value Discovery Sprint

Start here

The way in: agree the outcome, the measures and the owner before any build.

02

AI Transformation

A roadmap and the first AI wins, measured before and after.

03

AI Agent Workflow

One operational workflow redesigned around AI agents and human approval.

04

Digital Product Build

A production product built, tested and handed over with its evidence.

05

MVP Launch

A first version in users' hands, fast, with the path to scale mapped.

Seven stages. Seven quality gates.

01
Business Problem Discovery
Gate 1: The business problem and outcome, agreed in writing

02
Value Mapping
Gate 2: A value map with a baseline, a target and an owner for each measure

03
Intelligent Solution Design
Gate 3: The design reviewed against the outcome, not just the spec

04
AI-Assisted Engineering
Gate 4: Code built with AI assistance and reviewed by senior engineers

05
Automated Quality Assurance
Gate 5: Automated tests from the first build; nothing moves on until it passes

06
Smart Deployment
Gate 6: A release that ships safely, with a way back

07
Continuous Optimisation
Gate 7: Results reported against the outcome, and the next improvement chosen

Quality is managed, not inspected.

Every stage ends at a gate with an owner and agreed evidence. Automated quality assurance runs from the first build, and nothing moves on until its gate is passed. You see the metrics, not just a status.

What we don't do

We don't sell resources by the seat.

We don't compete on hourly rate.

We don't hand over unowned work.

We don't do staff augmentation.

We don't apply AI for its own sake.

A named owner

Every engagement has a TechXio owner accountable for the agreed outcome.

You own what we build

The client owns the IP and the code, with the evidence from every gate.

Proven in products we build and run.

Our AI advice comes from shipping AI products, not just recommending them. Each is built and run on the TechXio Value Method.

EdXsim

Flagship · Live · edxsim.com

AI business simulation

AI business simulation with personal AI coaching and automated assessment, for business schools and corporate L&D.

PeopleSmartAI

Flagship · Launching soon

AI HR system

One system of record from hire to retire. AI agents do the work; people approve the decisions.

AxenticOne

Flagship · Live · axenticone.com

Order to cash

One record from order to cash. AI proposes, people approve, and every step is evidenced.

ALSO IN THE LINE

Six products, one parent brand.

Axion

Student recruitment

Takes each agent and counsellor to the next piece of work and moves applications forward, with people making the decisions. Part of PeopleSmart AI.

MarkXecute

Marketing operations

AI agents plan, run and track marketing activity in one place.

PropSage

Property data and analysis

Sourced, dated UK property data and plain-English analysis, from first search to long-term management.

Product	For	Status
EdXsim	AI business simulation	Live · edxsim.com
PeopleSmartAI	AI HR system	Launching soon
AxenticOne	Order to cash	Live · axenticone.com
Axion	Student recruitment	Live · Part of PeopleSmart AI
MarkXecute	Marketing operations	Launching soon
PropSage	Property data and analysis	Launching soon

PeopleSmart AI is the banner over PeopleSmartAI and Axion. Each product keeps its own identity on its own site; on TechXio material it appears as “A TechXio product”.

WHERE WE WORK

Four locations. One team, one standard.

Client engagement, consulting, contracting and programme governance sit with the UK company. All four locations work to the same documented standard, so quality does not depend on who picked up the work.

United Kingdom — Headquarters and client engagement

Suite 602, 6th Floor, 252-262 Romford Road, London E7 9HZ

United Arab Emirates — Middle East and Africa engagement

26th Floor, Amber Gem Tower, Ajman

India — Engineering and delivery centre

Office 21, 20th Floor, Gold Office, Wave One, Noida Sector 18, Uttar Pradesh 201301

Bangladesh — Engineering and delivery hub

5th Floor, B5, KTH Assure Heights, 103 New Circular Road, Siddheswari, Ramna, Dhaka 1217

HOW WE START

Tell us the outcome you need.

Book a consultation. We will test the business case and, if it is right, start with a Value Discovery Sprint: outcome, measures and owner agreed in writing before any build is priced.

Start a Value Discovery Sprint
