Every order, evidenced from intake to cash.

AxenticOne is an order-to-cash platform for businesses that sell through someone else's supply chain. It captures each order, tracks it to delivery, invoices it with evidence and reconciles the payment.

WHAT IT DOES

OrderFlow

The intake agent turns the order email into one record.

SupplyFlow

Status and delivery matched from supplier reports.

InvoiceFlow

Invoices drafted with every calculation shown; a person approves.

SettleFlow

Payments matched; an aged list of unpaid invoices.

HOW IT WORKS

01
Capture
One record per order.

02
Track
Exceptions get an owner.

03
Invoice
With its evidence pack.

04
Settle
Reconciled to cash.

STATUS

Live at axenticone.com. Customer-hosted, with your own AI model.
