Realistic decision practice, at scale.

EdXsim is an AI-powered business simulation platform for business schools, universities and corporate learning teams, with personal AI coaching and automated assessment.

WHAT IT DOES

Business simulations

Learners run a business through realistic decisions and see the consequences.

Personal AI coaching

Every learner gets feedback on their own decisions.

Automated assessment

Less marking load for faculty and trainers.

Three editions

Learn, Enterprise and Coach.

HOW IT WORKS

01
Set up
Choose a simulation and cohort.

02
Play
Learners make decisions in rounds.

03
Coach
AI feedback after each round.

04
Assess
Results and evidence for each learner.
